November 9, 2021

Es ist definitiv nicht normal, dass so viele, vor allem junge Sportler, bei der Ausübung ihres Sports einen Herzstillstand erleiden oder sterben, aber seit Ende 2020 passiert das. Viele dieser Herzprobleme und Todesfälle ereignen sich kurz nach der COVID-Impfung. Es ist zwar möglich, dass dies auch Menschen passieren kann, die keine COVID-Impfung erhalten haben, aber die schieren Zahlen weisen eindeutig auf die einzige offensichtliche Ursache hin.

**Ende dieses Berichts:** Wir müssen noch 44 Berichte verarbeiten, alle für 2024.

Nachdem wir sie im nächsten Monat fertiggestellt und hier hinzugefügt und die Tabelle aktualisiert haben, werden wir erwägen, dieses Projekt zu beenden. Wir werden auch alle Berichte überprüfen, die als „Nicht impfbezogen“ gekennzeichnet sind, und sie alle in einem einzigen Bericht zusammenfassen, aus den im nächsten Absatz genannten Gründen. Vielen Dank an alle, die neue Daten, Aktualisierungen, Korrekturen und Anpassungen gesendet haben. Ihre Bemühungen werden nicht nur von uns geschätzt, sondern auch von Forschern, echten Journalisten, die die Wahrheit berichtet haben, und den Menschen, die durch diese Informationen aufgeklärt wurden. Keine unserer gemeinsamen Bemühungen wurde von denen gewürdigt, die versuchten, alle Informationen zu verbergen, einschließlich der wertlosen „Faktenprüfer“, derjenigen, die versuchten, dies als Fehlinformation zu entlarven, und derjenigen, die diese Probleme verursacht haben, aber was sie denken, ist uns egal.

**Interpretation der Schlagzeile:** In den letzten drei Jahren haben wir 2100 Berichte bearbeitet, und von den 2100 sind 1474 tot. Das heißt, 626 sind nicht gestorben. Der Grund, warum wir die Schlagzeile so geschrieben haben, ist, dass die Leute am Anfang die beiden Zahlen zusammenzählten und dadurch die Zahl fälschlicherweise aufblähten, und dann hatten Leute, die die Fakten überprüfen wollten, einen Riesenspaß damit, zu behaupten, unsere Zahlen stimmten nicht. Tatsächlich gab es mehr als 2100 Berichte, aber anfangs versuchten wir, zwischen wahrscheinlich geimpft und wahrscheinlich durch Impfung verursacht zu unterscheiden, aber dann begannen die Vereine, Familien, Medien und Regierungen, den Impfstatus zu verheimlichen, sodass es fast unmöglich war, festzustellen, ob die Leute geimpft waren oder nicht. Aber wir hielten die Angaben „möglicherweise nicht geimpft“ oder „unwahrscheinlich geimpft“ trotzdem getrennt. Vielleicht sollten wir das nicht tun und einfach den Bericht und die Todesfälle verfolgen und späteren Forschern überlassen, festzustellen, wer geimpft war und wer nicht. Der Grund, warum wir sie möglicherweise alle hinzufügen, besteht darin, dass die Bilanz der letzten drei Jahre leichter mit den Vorjahren verglichen werden kann, da in den Vorjahren kein Teil des Datensatzes aus der Liste ausgeschlossen wurde.

Die sogenannten Gesundheitsexperten, die die COVID-Impfprogramme auf der ganzen Welt leiten, wiederholen immer wieder, dass „*der COVID-Impfstoff ein normaler Impfstoff ist und dass er sicher und wirksam ist*“.

Als Reaktion auf ihre Erklärung folgt hier eine nicht abschließende und ständig wachsende Liste hauptsächlich junger Sportler, die 2021/2022/2023 nach einer oder mehreren COVID-Impfungen schwere gesundheitliche Probleme hatten. Viele dieser Fälle wurden zunächst nicht gemeldet. Wir wissen, dass vielen Menschen gesagt wurde, sie sollten niemandem von ihren Nebenwirkungen erzählen, und die Medien berichteten nicht darüber. Die Nebenwirkungen begannen nach den ersten COVID-Impfungen aufzutreten und nahmen zu. Die Mainstream-Medien berichten noch immer nicht über die meisten Fälle, aber die Sportnachrichten können die Tatsache nicht ignorieren, dass Fußballspieler und andere Stars mitten im Spiel aufgrund eines plötzlichen Herzstillstands zusammenbrechen. Viele von ihnen sterben – 69,4 % zum 31. Dezember 2022 und 70,1 % zum 31. Dezember 2023.

Gary Dempsey, Profi-Fußballspieler, spielte in 20 Jahren 500 Spiele ohne einen einzigen Herzstillstand.

Wir stellen auch fest, dass viele Beiträge auf Facebook, Instagram, Twitter, in Foren und in Nachrichten gelöscht werden. Dann erhielten wir einige Nachrichten, in denen es hieß, es gebe keinen Nachweis für die Veranstaltung oder den Impfstatus. Das liegt zum Teil daran, dass diese Informationen verborgen werden.

Immer mehr Leute schreiben uns, dass wir in vielen Fällen den Impfstatus einer Person nicht erwähnt haben. Dafür gibt es einen guten Grund. Obwohl alle dachten, es sei großartiges Marketing für sie und eine Möglichkeit, Tugendhaftigkeit zu zeigen, prahlten sie mit ihrem Impfstatus. Jetzt will keiner der Vereine diese Informationen preisgeben. Keiner ihrer Sponsoren will sie preisgeben. Die Regierung will sie nicht. Die Versicherungsgesellschaften verlangen sie nicht. Den Spielern wurde gesagt, sie sollen sie nicht preisgeben. Die meisten Angehörigen der Spieler wollen es nicht erwähnen. Keines der Medien stellt diese Frage. Was also sollen wir tun? Das jetzt stoppen? Nein, wir werden so viele Informationen wie möglich sammeln, solange sie noch verfügbar sind, denn irgendwann werden weitere Informationen ans Licht kommen, und wir werden hier sein, um sie zusammenzutragen.

Wird das irgendetwas bedeuten? Wir wissen es nicht. Was wir wissen, ist, dass weltweit konzertierte Anstrengungen unternommen werden, diese Informationen verschwinden zu lassen. Allein diese Tatsache sagt uns, dass sie gesammelt, untersucht und gespeichert werden müssen, damit andere Forscher sie untersuchen und feststellen können, ob es nützliche Muster gibt. Dies könnte eine der Untertreibungen des Jahrhunderts sein.

Auf Anraten eines Lesers haben wir etwa ein Dutzend Vorkommen des Wortes „Schuss“ durch „Injektion“ ersetzt, da die Übersetzung in andere Sprachen besser ist.

Wir sind den in dieser Liste genannten Sportlern (oder ihren Familien) sehr dankbar, dass sie bestätigt haben, was ihnen passiert ist, damit die Wahrheit ans Licht kommt. Sie kümmern sich um ihre Mitsportler, auch wenn dies den Vereinen, ihren Sponsoren, den Medien, Politikern und sogenannten Gesundheitsexperten nicht so wichtig ist.

Auf der Liste stehen viele Profisportler und Amateursportler auf hohem Niveau. Es wäre nicht sinnvoll, den Tod jeder Person auf der Welt zu melden, deshalb haben wir eine Kategorie von Personen ausgewählt, die fit genug sein sollten, um ein langes und gesundes Leben zu führen. Das bedeutet, dass eine Person, sofern sie einigermaßen fit und gesund ist und etwas Sport treibt, und kein untrainierter „Couchpotato“ ist, in diese Liste aufgenommen werden kann. Selbstverständlich handelt es sich dabei nur um Personen, die uns von Lesern gemeldet wurden oder die wir bei unseren Recherchen entdeckt haben. Beachten Sie auch, dass über fast alle von ihnen in den Medien berichtet wurde. In einigen Fällen haben wir die sozialen Medien einer Person selbst oder Berichte von ihrer Familie. Zum Beispiel der lautstarke Impfbefürworter Uche Nwaneri, der 38-jährige ehemalige American-Football-Spieler der Jacksonville Jaguars, der sagte, Impfgegner sollten ins Gefängnis – bis er plötzlich starb.

Es gibt viele Länder oder Staaten mit großen Bevölkerungen, über die in unserer Liste fast keine Meldungen vorliegen. Das bedeutet wahrscheinlich, dass uns keine Ereignisse gemeldet werden. Die tatsächlichen Todes- und Verletzungszahlen sind wahrscheinlich viel höher als die, die wir hier auflisten.

## Vorjahresdaten

---

Das Internationale Olympische Komitee in Lausanne (Schweiz) untersuchte Dokumente aus internationalen Datenbanken von 1966 bis 2004. Diese Dokumente weisen auf 1.101 plötzliche Todesfälle bei Sportlern unter 35 Jahren und über 38 Jahren hin, also durchschnittlich 29 Sportler pro Jahr. Die Sportarten mit der höchsten Inzidenz sind Fußball und Basketball. In dem Dokument heißt es, diese plötzlichen Todesfälle seien „überwiegend durch bereits bestehende angeborene Herzfehler verursacht“ worden.

Nach dem Lausanner Bericht werden nun alle Profisportler auf angeborene Anomalien untersucht, sodass für diese Profisportler jeglicher Vergleich mit den Vorjahren nicht mehr gültig ist, da Menschen mit angeborenen Anomalien ausgesondert wurden und nicht spielen können. Viele werden auch regelmäßig getestet. Es muss also „etwas anderes“ für diesen plötzlichen Anstieg verantwortlich sein. ( [NIH-Dokument](#) ) Die Schlussfolgerungen können Sie in [dieser Folgestudie von 2006](#) nachlesen . Wir überlassen die Folgeuntersuchungen nun anderen Forschern und hoffen, dass diese Datensammlung es ihnen erleichtert, Kandidaten für die Aufnahme in die Studie zu identifizieren.

Eine von Maron durchgeführte Studie über plötzliche Todesfälle bei Sportlern in den USA zwischen 1980 und 2006 ergab in 38 Sportarten 1.866 Todesfälle von Sportlern mit Herzerkrankungen im Verlauf von 26 Jahren, wobei eine hypertrophe Kardiomyopathie vorherrschte.

In den Jahren 2005 und 2006 gab es durchschnittlich sechshundsechzig (66) Todesfälle pro Jahr, von denen sich 82 % während Wettkämpfen oder beim Training ereigneten.

Vielen Dank an die Leser des Investigator-Magazins, die diese Berichte und diese Geschichte auf Spanisch entdeckt haben: Momento Deportivo .

In den Jahren 2021 und 2022 wurden Herzerkrankungen nur in zwei von uns gefundenen Berichten erwähnt. Hypertrophe Kardiomyopathie wurde nur zweimal erwähnt, und diese beiden Berichte waren in der Liste „nicht impfbezogen“ aufgeführt. „Vergrößertes Herz“ wurde nur dreimal erwähnt, aber es gab keinen Hinweis darauf, dass es sich um ein langfristiges oder aktuelles Problem handelte (möglicherweise aufgrund einer Impfverletzung). Wir gehen davon aus, dass die meisten Menschen mit angeborenen Herzerkrankungen bereits ausgesondert wurden.

Aus den obigen Ausführungen geht hervor, dass es in den Vorjahren jährlich 66 Todesfälle gab, davon jedoch allein im Januar 2022 97, im Jahr 2021 416, im Jahr 2022 791 und im Jahr 2023 245. Bei keinem dieser neuen Todesfälle handelte es sich den Berichten zufolge um angeborene Anomalien, die in den Vorjahren die Hauptursache darstellten.

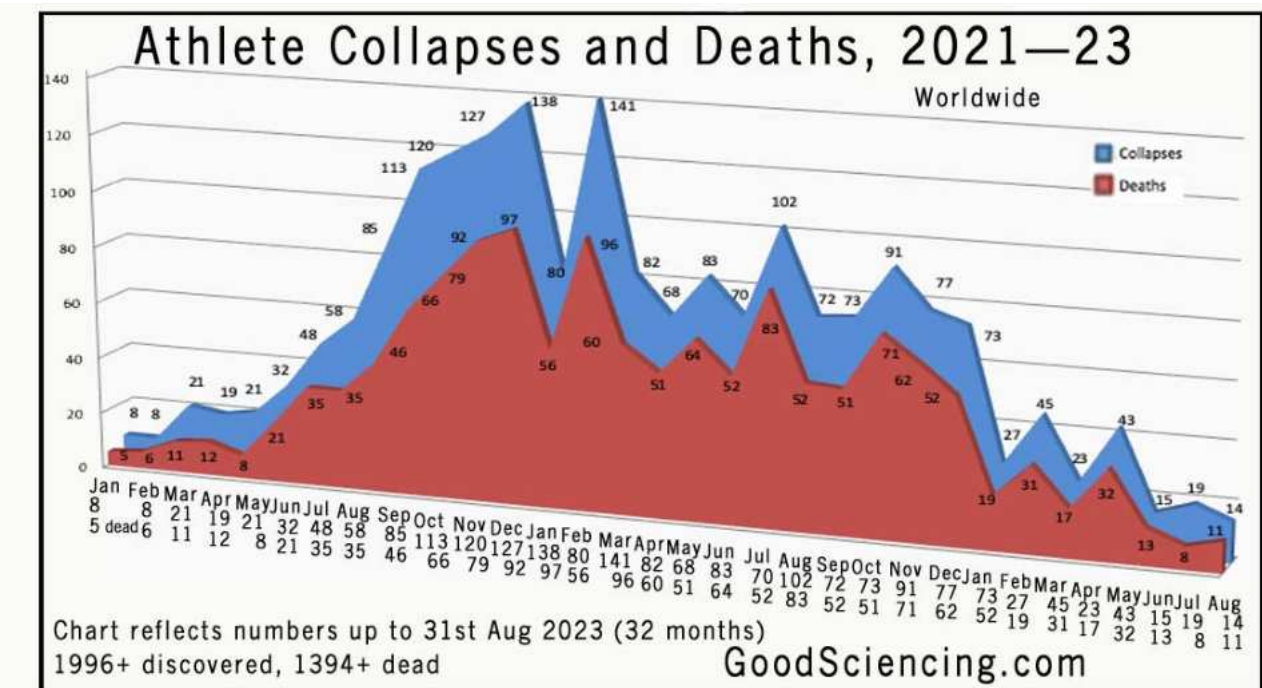

Diagramm der Zusammenbrüche und Todesfälle von Sportlern vom 1. Januar 2021 bis 31. August 2023. Gute wissenschaftliche Erkenntnisse.

## Starttermine für COVID-Impfstoffstudien

Die COVID-19-Impfstoffstudien begannen Anfang 2020. Hier sind die ungefähren Startdaten wichtiger Impfstoffstudien:

**Pfizer-BioNTech:** BNT162 startete im April 2020.

**Moderna:** mRNA-1273 begann im März 2020.

**AstraZeneca-Oxford:** begann im April 2020.

**Johnson & Johnson:** Start im September 2020.

## Wachsender Bericht

Diese Geschichte wird mit der Zeit erweitert, wenn neue Informationen hinzugefügt werden. Wenn Sie Beweise für Informationen haben, die wir noch nicht haben, oder wenn Sie eine Korrektur haben, senden Sie diese bitte mit so vielen Informationen wie möglich über unser Kontaktformular. Nützliche Informationen wären der Name der Person, ihr Alter, was mit ihr passiert ist, ob sie die COVID-Impfung(en) erhalten hat, das Datum des Ereignisses oder Todes sowie ein Link zu einer beliebigen Nachrichtenmeldung.

Besonderer Dank gilt den Lesern, die Korrekturen vorgenommen, Fehler gefunden haben, die wir übersehen haben, oder uns neue Informationen geliefert haben, von denen wir nichts wussten. Es ist jetzt eine echte Teamleistung und wir wissen das zu schätzen.

**Derzeit werden** 44 Berichte geprüft, 30 davon sind tot (alle im Jahr 2024).

**Hinweis:** In den Jahren 2022 und 2023 nahmen die Meldungen über die Zahl neuer Krebserkrankungen zu. An manchen Orten meldeten einige Ärzte fünfmal mehr Krebserkrankungen als 2020/21, und viele davon wurden erkannt und sofort als Stadium 4 eingestuft. Wir überlassen es anderen, daraus Schlussfolgerungen zu ziehen, aber es gab weltweit viele neu entdeckte Krebstodesfälle, die oft als *„nach kurzer Krankheit gestorben“ beschrieben werden*. Einer unserer Forscher kennt 6 Personen in einer Familie mit Krebs im Endstadium, der entdeckt wurde und direkt in Stadium 4 überging. Der jüngste der sechs versuchte, ihn mit Chemotherapie zu bekämpfen, starb jedoch vier Monate später.

Skeptiker, die das für normal halten, können die folgenden 18 Wörter nach dem Lesen jedes Namens auf der Liste gerne wiederholen.

## Wiederholen Sie dies nach dem Lesen jeder Zeile

603. 04/10/2022 USA

Anthony Smith (34), UFC martial arts fighter discovered a blood clot in his leg for which he needed hospital treatment. He blames this clot on the covid vaccine which he got to keep his job despite his mom dying from a booster shot. In September 2021, Smith broke his leg in a fight with Ryal Spann and had surgery on his knee. In July 2022, his mother died 2 weeks after a COVID booster that caused her to have a stroke. It put her into a coma and she died 2 weeks later. In a fight against Ankalaev on 30 July 2022, his leg snapped and he had leg surgery a week later, but then they discovered a blood clot in his leg. The night before he went to UFC Paris, he suffered an anaphylactic reaction. We speculate he got a COVID vaccination around 1st September so he could travel to Paris. Around October 3rd 2022, he said "The night before I went to Paris [for UFC Paris], I had a weird allergic reaction to some meds. ... It was a really bad anaphylactic reaction. I was losing my airway, I couldn't swallow. I was having a tough time breathing. Kind of barely got to the hospital in time before things got too rough. Then after I got back from Paris, they found a blood clot in my leg. So I've been battling this blood clot for a while." Alexandre Joao Kisonga (37), professional basketballer, Congo-Angolese origin lived in Italy since age 4, had Astrazeneca viral vector vaccine 6th April 2021, suffered exhaustion and slight pain during inoculation. On June 22 for his second vaccination, Astrazeneca was banned. The doctor asked him to choose Moderna or Pfizer (mRNA vaccines) – how could he possibly know the consequences? The doctor recommended Moderna and he agreed. Four days later, he felt exhaustion, tiredness and pain in the neck on the morning of a training session. After training, headaches began and his body temperature rose excessively. Headache continued for several days and his temperature rose again. On medical advice, he took Tachipirina to lower fever. A week later, he was no better and tried a COVID swab which returned a negative result. A week later, symptoms continued and he went to the hospital in Milan, diagnosed with tachycardia. Doctors did not want to talk about the vaccines but eventually diagnosed acute perimyocarditis. Six months later, he still cannot play. UPDATE: Jo says he will undergo a stress test January 11 2022, to see if he can return to play basketball. He expects to have a scar on his heart for life and will take 2 tablets a day for the next year. It may affect his physical activity.

2097. ??/02/2021 Norway

Sander Haugrud (24), Norwegian kickboxing champion in 2019. Two weeks after his second COVID vaccine, stabbing chest pain started, after no previous history of heart problems or any health issues. Diagnosed with pericarditis. Physician at the hospital confirmed it was due to the vaccine. Sander Haugrud: "A couple of weeks after the second dose, I got a sting in my chest that turned out to be heart bag inflammation. I was on surveillance for three days. I have competed nationally and internationally in kickboxing, since the age of 10 to now. But it's a full stop at training and I don't know if I can ever train like I did. Now I'm mostly in prison. This might have been avoided, if I had a corona instead, I guess I'd be well by now. It is scary to know that no one mentions anything, I had to dig myself to find information, then I found that there were many cases like mine. At the hospital, doctors had a hard time believing the inflammation was due to the vaccine, but in the end the superior admitted it and said to report it to the Drug Enforcement Administration."

## **May Or May Not Be Vax Related**

---

There is insufficient information to decide if any of these collapses or deaths are related to COVID vaccinations. More investigation is needed. Any help would be appreciated because keeping with the ongoing investigations isn't easy. These are listed here because they appear in some lists as vax-caused, but we believe there is either currently insufficient information to decide or other explanations seem to overrule vax-caused, such as cancer.

Some of these people should be in the main list. We hope that eventually, their friends and relatives will provide us with more information about vaccination status, or what happened to them in the days weeks or months before they died.

1. 21/12/2022 Russia Dead

Many sports teams now have multiple sidelined players. There are dozens of them. The teams and Big Media are hiding this, thinking nobody will notice. These damaged players will not be shown in this report if they are reported only as “illness” but they would be worth tracking, because it is not normal to have so many. Their immune systems are likely to have been compromised by “something,” so they will be open to many things they would normally have been able to shrug off. We leave it to others to track these – we have our hands full handling the investigations for this list, going back in time trying to find new information that wasn’t available before, and making minor corrections as they are discovered. It will all come out eventually. Or maybe it won’t because governments are pretending none of this happened at all, and if it did, it was someone else’s fault.

## Zahl der Todesfälle beim Militär nimmt zu

---

Thomas Renz, ein amerikanischer Anwalt, sagt, dass die DMED-Datenbank (Defense Medical Epidemiology Database) des US-Militärs zeigt, dass in den ersten 10 Monaten des Jahres 2021 die „Gesamtmorbidität“ im Vergleich zum Vorjahr um das 11-fache (1100 %) gestiegen ist. Renz verfügt über Informationen von Whistleblowern des Verteidigungsministeriums. Berichten zufolge löscht das Verteidigungsministerium aktiv Daten aus der Datenbank, möglicherweise um den Völkermord an Militärangehörigen zu vertuschen.

Er sagte außerdem, dass man für 2022 mit einem Anstieg der Zahlen um 5.000 % rechnen – also dem 50-fachen des Vorjahres.

## Gute wissenschaftliche Berichte

---

Unsere laufenden Aktualisierungen der Grafik in diesem Beitrag zeigen deutlich die Zunahme unerwünschter Ereignisse bei Sportlern.

Jemand sagte, wir würden Dinge verheimlichen, weil wir nur „das Nötigste“ vom Jahr 2022 zeigen. Das tut uns leid, aber wir haben keine Kristallkugel, um in die Zukunft zu sehen. Wir erwarten lediglich, dass a) einige Leute in den kommenden Monaten weiterhin „überrascht“ sein werden über die Zahl der Todesfälle unter Sportlern und b) obwohl es Februar ist, werden auch in Zukunft Verletzungen und Todesfälle aus den Vormonaten entdeckt.

Wir wissen, dass uns nicht alle Berichte über Herzstillstände vorliegen und auch nicht alle Todesfälle. Die Sportvereine verheimlichen immer noch die Fälle, in denen Spieler nicht gestorben sind und nicht in die Nachrichten kamen. Wir vermuten, dass vielen Spielern, die „*an einer mysteriösen Krankheit litten*“, gesagt wurde, sie sollten nach Hause gehen, sich ausruhen und in aller Stille leiden.

## Termine der ersten Impfungen

---

Die Daten der ersten „verfügbaren“ Impfungen variieren weltweit, in verschiedenen Staaten und Städten. Wir verfügen über eine kleine Datensammlung in einem separaten Artikel und wissen, dass es in den Monaten vor der offiziellen Einführung Versuche gab. Nur weil ein Land an einem bestimmten Datum mit der Einführung begonnen hat, heißt das also nicht, dass einige Menschen in den Wochen und Monaten zuvor nicht geimpft wurden. Wenn wir einen endgültigen Beweis dafür erhalten, dass jemand nicht geimpft wurde, ändern wir die Aufzeichnung. Beamte und Medien leisten derzeit hervorragende Arbeit dabei, alle nützlichen Informationen zu verbergen. Sie bezeichnen geimpfte Personen auch als ungeimpft, wenn ihre Impfung nicht länger als zwei Wochen zurückliegt, und wenn ihre Auffrischungsimpfung fällig ist und sie diese nicht erhalten, werden sie als ungeimpft abgestempelt. (d. h. die Regierung und die Medien erzählen Lügen – es ist ein cleveres Schema, aber es ist immer noch eine Lüge, da das Material, das ihrem Körper zugeführt wird, nicht verschwindet und der angerichtete Schaden mit der Zeit nur schlimmer wird.)

Australiens erste Versuche am Menschen mit einem potenziellen COVID-19-Impfstoff wurden beispielsweise am 26. Mai 2020 in Melbourne mit dem Novavax NVX-CoV2373 durchgeführt. Es gibt keine Dokumentation darüber, wer an den Versuchen teilgenommen hat. Die Therapeutic Goods Administration genehmigte den Impfstoff von Pfizer-BioNTech am 25. Januar, den Impfstoff von Oxford-AstraZeneca am 16. Februar und den Impfstoff von Janssen am 25. Juni. Phase 1a begann am 21. Februar 2021 und Phase 1b der Einführung begann am 22. März.

Anfang November 2020 begannen die Philippinen mit Phase 3 der COVID-19-Impfstoffversuche. In Phase 3 werden Tausende von Menschen geimpft, bevor eine Zulassung zur Markteinführung in Betracht gezogen wird; in den Monaten zuvor wurden bereits Menschen geimpft.

## Clubs verbergen jetzt Impfinformationen

---

Hier ist ein Beispiel dafür, wie Sportvereine nicht wollen, dass die Verletzungen oder Todesfälle ihrer Spieler mit den COVID-Impfstoffen in Verbindung gebracht werden. Es zeigt, warum sie nicht bekannt geben, welcher ihrer Spieler geimpft wurde und wann. Der Manager des FC Sunderland, Lee Johnson, vermutete, dass die COVID-Impfstoffe die Herzprobleme seines Torhüters Lee Burge verursacht haben könnten. Der Verein entließ daraufhin den Manager.

Bilden Sie sich Ihre eigenen Schlüsse darüber, warum der Verein einen Manager entlassen würde, dem das Wohl seiner Spieler am Herzen liegt.

## **Eindeutiger Impfnachweis**

---

Die sogenannten Faktenchecker versuchen zu behaupten, dass 100 % der von uns gesammelten Daten wertlos seien, weil wir nicht immer einen eindeutigen Impfnachweis haben. Nun, gute Nachrichten, Faktenchecker, Sie liegen nicht nur falsch, Sie sind Idioten.

Während es in der Vergangenheit jedes Jahr relativ wenige Todesfälle unter Sportlern gab, die nicht auf Altersschwäche oder Krebs zurückzuführen waren, gab es seit Beginn der COVID-Impfversuche nie wieder etwas Vergleichbares. Und sie wissen es, aber es ist ihnen egal. Wir werden weiterhin so viele Informationen wie möglich über jede verstorbene Person sammeln. Es handelt sich um echte Menschen, nicht nur um Zahlen.

Wie wir bereits an anderer Stelle gesagt haben, sammeln wir Daten. Andere Menschen können diese Daten verwenden und sie ergänzen, wenn sie können, um zu erforschen, was immer sie wollen. Wir lassen uns davon nicht ablenken, auch wenn Familien, Vereine, Regierungen und die Medien Informationen vor uns verbergen. Wir wollen Familien nicht schaden, aber Familien können echte Daten nicht verbergen, weil das anderen Menschen schaden könnte.

Laut Angaben der Regierungen sind mittlerweile 90-95 % der Bevölkerung weltweit geimpft, die Faktenprüfer haben also ein Problem. Wenn das stimmt, dann ist so gut wie jeder geimpft. Wenn das nicht stimmt, dann lügen die Regierungen, möglicherweise um aus verschiedenen Gründen diejenigen zu zwingen, die sich nicht impfen lassen wollen. Wir werden so viele Daten veröffentlichen, wie wir finden können, und von Zeit zu Zeit werden wir und unsere Leser Informationen entdecken, die vorher nicht gefunden wurden, und diese werden dann hinzugefügt.

## **Hassmails und Morddrohungen**

---

As well as receiving new cases and updates from alert readers, we are also receiving hate mail and death threats/wishes. Haters need to get a life. The sports people suffering these adverse reaction and deaths didn't ask for this. Neither did the tens of thousands of other people. They all thought they were doing the right thing. Many were coerced into getting the vaccinations. When one of these adverse events happens to you or one of your kids or relatives, you'll be glad we're collecting all this data. If you are one of the haters who thinks vaccination is the way out of this nightmare, read the story about [three young women whose lives have been destroyed by the vaccine](#).

We're not going to stop what we're doing. April 2022 update: The hate mail and death threats stopped – the overwhelming data is now widespread and it is too late to stop it getting out.

## Interesting Notes

---

Initially, several readers sent a video about Australian Cricketer Shane Warne. The man in that video was Blair Cottrell – he is NOT Shane Warne’s son. Due to hiding of information by Shane’s family, and others were initially unable to verify the claim that Shane Warne complained of chest pain previously, or that he planned to get medical help in Indonesia. Now, after several months, doctors conclude that his sudden death was likely precipitated by the Covid mRNA Vaccine.

Unrelated to Shane Warne, we note a small number of deaths later marked as “*suicide*” but no explanation – we are constantly looking to update reports, but a declaration of suicide with no other reason provides nothing useful. We’re still looking.

## Where Are The Serious Fact-Checkers?

---

Readers are writing to us asking for comparisons from previous years. Some say without that, these results mean nothing. That’s not true because if we had seen this in previous years, it would be well known and others would have documented it. We have done that and there’s no comparison.

Where are the fact-checkers? Where is the mainstream media? Some have piles of money from Bill Gates. Why are they not proving us wrong by all piling on and showing the documented Athlete deaths from 2019, 2018, 2017 and the previous decade?

They are nowhere to be found because this number of athlete deaths is abnormal and they know it. They have money from people who don’t want journalists poking around. So that’s why they don’t try to thoroughly Fact-Check these reports or show previous year numbers.

Follow this link to see [Gates Foundation handouts](#) to some media that could do it. For example, NPR in the U.S.A. received \$24 million.

The Gates Foundation also funded many investigative journalism centers, with around \$38 million. Could that be why journalistic curiosity suddenly stopped being a thing?

A few weak attempts at “*debunking*” this data have started to come out, but they cherry-pick a small number of the entries and try to use that to discount everything.

## Thanks to Many Contributors

---

Many people are contributing to this, some indirectly by reporting to Telegram groups and other websites. There are many duplicates and in some cases, people report things we’ve had for months, but every report helps because sometimes there is a small piece of information we didn’t have before, such as a date, an autopsy report, a name spelling, or a report from months ago that never made it into a news story. That was the case with Chuck “Kali Muscle” Kirkendall. Helpful websites include [DVDbeaver](#), [The COVID Blog](#).

## **Es kommt weiterhin zu schweren Reaktionen und Todesfällen**

---

Das ist die aktuelle Liste ... die meisten, wenn nicht alle dieser Athleten haben nach COVID-Impfungen an Herzproblemen gelitten. Als ich diesen Artikel schrieb, waren 28 Menschen gestorben. Das war nicht normal, aber dann, 10 Tage später, wurden 56 Todesfälle aufgeführt, und die Zahlen steigen. Jeder andere echte Impfstoff wäre schon lange vorher vom Markt genommen worden. Die Medien würden Fragen stellen. Sie würden Druck auf die Regierungen ausüben. Aber das tun sie nicht. Und die Regierungen schalten weiterhin Fernseh-, Radio- und Zeitungsanzeigen, in denen sie die Menschen dazu ermutigen, sich ihre 1., 2., 3. und 4. Covid19-Impfung zu holen. Vielleicht sagen die Mainstream-Medien deshalb so wenig, weil sie staatliche Gelder für Anzeigen einsammeln?

Die Todesfälle und schweren Reaktionen werden so lange weitergehen, bis so viele Menschen sterben, dass klar wird, dass der Impfstoff zehn- bis hundertmal schlimmer ist als das Virus, das er behandeln soll.

Diese Athleten sind die Kanarienvögel in der Mine, die uns vor drohender Gefahr warnen. Sie werden versteckt, damit die Leute, die nicht aufpassen, die Warnung nicht sehen.

Wir sehen die Sportler nur, weil sie im Rampenlicht stehen. Die Niemande – also die meisten Bürger – kommen nicht in die Nachrichten.

## **Umgekehrte Sortierung nach Datum**

---

Da in den Jahren 2021 und 2022 so viele Sportler starben, wurde die Liste so groß, dass viele Leute nach einer umgekehrt sortierten Liste fragten, da sie immer wieder zurückkommen, um neue Ergänzungen zu sehen. Wir arbeiten an einer Datenbank, die verschiedene Sortierkriterien ermöglichen könnte, aber im Moment wird sie manuell verwaltet. Bitte beachten Sie, dass wir jede Woche, hauptsächlich dank der Leser, neue Einträge und zusätzliche Informationen in den vergangenen Monaten entdecken.
